

MISHAEL AGUWAMBA

Aspiring Software Developer | Web Development & Python Backend

Enugu State, Nigeria | mishaelchidimd@gmail.com | 0704 036 1573

PROFESSIONAL PROFILE

Aspiring Software Developer currently developing practical skills across frontend web development and Python backend development.

My development journey began with HTML and CSS before progressing into JavaScript, where I have built interactive browser applications and developed practical experience with programming logic, events, animation, collision detection, responsive interfaces, debugging, and deployment.

I am currently expanding into Python and backend development, building a broader understanding of how applications work beyond the frontend. I learn primarily through hands-on practice, experimentation, and building projects rather than relying only on theoretical knowledge.

I bring strong logical reasoning, persistence, curiosity, and a willingness to learn and improve continuously.

TECHNICAL SKILLS

Frontend Development

HTML5, CSS3, JavaScript, Responsive Web Design, DOM & Event Handling, Canvas 2D, Interactive Web Interfaces

Programming

JavaScript, Python (currently developing)

Backend Development

Python backend development (learning), Programming fundamentals, Data types & type handling, Functions/conditions/loops, Backend concepts & application logic

Development Tools

Git, GitHub, GitHub Pages, Visual Studio Code, Browser Developer Tools

Practical Development

Debugging, Problem solving, Project deployment, Responsive design, Interactive application development

PROJECTS

Fantasy Adventure — Interactive Browser Game

HTML • CSS • JavaScript • Canvas • GitHub Pages

A browser-based fantasy platformer developed as a practical web-development project.

- Player movement and controls
- Gravity and jumping physics; double-jump mechanics
- Multiple platforms and collectible Soul Shards
- Moving enemies with collision and stomp mechanics
- Portal and level-completion system
- JavaScript game loop and animation
- Mobile touch controls and responsive gameplay considerations
- Deployed via GitHub Pages

This project provided practical experience applying JavaScript programming logic to a complete interactive application, including debugging and iterative feature development.

Personal Developer Portfolio

HTML • CSS • JavaScript

A personal portfolio website developed to present my projects, technical development, and professional journey — built as both a professional profile and a practical demonstration of my frontend skills.

DEVELOPMENT EXPERIENCE

Independent Web Development Projects — Ongoing

- Building practical web applications while developing frontend and programming skills
- Applying HTML, CSS and JavaScript to interactive projects
- Using Git and GitHub to manage and deploy projects
- Debugging code and improving projects through testing and iteration
- Currently extending development knowledge into Python and backend programming

AI & DATA-RELATED EXPERIENCE

Data Annotation Specialist — Remote

August 2024 – Present

- Labeled and organized multimedia data for machine-learning workflows
- Maintained consistency and accuracy across annotation tasks
- Worked within defined project requirements and quality standards

AI Voice & Content Quality Review — Remote

May 2024 – Present

- Reviewed audio and video content for AI speech and language systems
- Evaluated content according to specified quality criteria
- Provided structured feedback to support quality improvements

AI Data Annotation & Content Work — Remote

2023 – Present

- Completed data annotation and review tasks for AI-related workflows
- Followed detailed project guidelines and quality requirements
- Maintained accuracy and consistency across assigned datasets
- Worked independently while managing task requirements and deadlines

EDUCATION

Post-Secondary Study — Latin (One-Year Programme)

Completed a one-year post-secondary programme with a qualification in Latin.

Web & Software Development Training — Ongoing

Current areas of study: HTML & CSS, JavaScript, Python, Backend development.

PROFESSIONAL STRENGTHS

Logical reasoning • Problem solving • Self-directed learning • Persistence with debugging • Attention to detail • Independent work • Willingness to learn • Adaptability • Practical, project-based learning

INTERESTS

Technology, software development, gaming, basketball, football, creative problem-solving, and continuous learning.
